

Get on board the...

HUMAN TRAIN

SATURDAY, SEPTEMBER 26

8:30 am – WESTON
Weston GO Station Platform
John Street entrance

March to send a message to Premier McGuinty:
**CLEAN ELECTRIC TRAINS NOW,
NOT 450 DIRTY DIESELS!**

9:30 am MOUNT DENNIS
Corner of Eglinton Ave and Weston Road

11 am THE JUNCTION CITY SQUARE
2960 Dundas Street West (at Pacific Ave)

NOON WALLACE PEDESTRIAN BRIDGE E/S
North of Bloor on Dundas West or Perth Ave

1 pm RALLY AT SORAUREN PARK
Sorauren Ave., west of Lansdowne, south of Dundas West

2:30 pm MARCH ALONG QUEEN STREET WEST
From Sorauren Park to Queen West and Bellwoods Avenue

Join the **HUMAN TRAIN**
at a Whistle Stop in **Weston**,
Mount Dennis, the **Junction** or
the **Wallace Pedestrian Bridge** and
walk the neighbourhoods bordering
the tracks to **Sorauren Park**.

Bring your family, friends and neighbours!
Make a banner, bring noisemakers,
wear something "Clean Train" blue!

THE MAIN EVENT!

Come to the **RALLY** in **Sorauren Park**
at 1 pm, Saturday, September 26th,
and join the **MARCH** departing at **2:30 pm**
for **Queen St West**. Rain or shine.

Volunteers needed!

You can help to make this day a great success!

TRANSIT FOR A HEALTHY CITY www.cleantrain.ca

The Clean Train Coalition represents the communities along the rail corridor. We believe that a healthy environment and vibrant neighbourhoods depend on smart investment in public transit infrastructure. Build it once. Build it right.

Do you know about plans to run over 450 diesel trains per day through our neighbourhoods?

Frequently Asked Questions

1. What Is the Metrolinx Proposal?

Currently around 50 diesel trains a day run along the Union Station to Georgetown rail corridor. The provincial transit authority, Metrolinx, is proposing to increase that number to more than 450 diesel trains a day, making it the busiest diesel rail corridor on the planet.

2. How Frequently Will the Trains Run?

In rush hours, one train every 90 seconds. For the rest of the 19 hours a day the trains will be running, they will be coming through at the rate of more than one train every 3 minutes.

3. Who Will Be Affected?

The proposed diesel expansion runs through twelve Toronto neighbourhoods that are home to over 300,000 people. There are 76 schools, 96 daycare centres and 4 long-term care facilities, including a chronic respiratory care hospital, within a kilometre of the tracks.

4. Does This Plan Take the Health of Toronto Residents into Account?

You be the judge. Only one other city of the top 100 cities in the world—Dhaka in Bangladesh—is building diesel rail links to their airport. There's a reason for this. Diesel fumes create a chemical soup of toxic air contaminants, which have been implicated in a host of illnesses to which children are especially vulnerable, including cancer, respiratory problems, reproductive and developmental disorders.

5. How Polluting Is Diesel?

In terms of the pollution generated, 450 diesel trains a day would be like having 9,000 trucks a day driving past your home or past your child's school or daycare centre.

6. Why Should I Worry? I Don't Live Near the Tracks.

Diesel trains spew toxic fumes for miles around. Only the largest particles will fall primarily on neighbourhoods close to the tracks. The rest will be carried on the wind for up to 200 miles, adding significantly to greenhouse gases and pollution in the GTA and beyond.

7. What Is the Clean Train Coalition?

The Clean Train Coalition is comprised of representatives from neighbourhoods and communities throughout the city, and concerned citizens of all ages. We believe that a healthy environment and vibrant neighbourhoods depend on smart investment in public transit infrastructure. The Metrolinx proposal, however, is neither smart investment nor is it public transit for Toronto. As currently planned, Torontonians will have little access to the trains that will roar through their neighbourhoods.

8. What Does the Clean Train Coalition Want?

The Clean Train Coalition demands that all new rail infrastructure be built for electric trains. Unlike diesel, electric trains are clean, quiet and fast for both a greener future and a more efficient transportation system. New York City has required the use of only electric trains since 1908!

9. Hasn't Metrolinx Announced a Study on Electrification?

GO Transit has already studied electrification at least four times, with each successive study showing that it can be done affordably, and within a three-year time frame. This latest announcement is nothing but a ruse to keep people along the corridor from demanding immediate electrification.
